In recent years the Politecnico di Milano has defined a hospitality policy with the priority objective of ensuring, in a higher-education context, adequate accommodation solutions for as many away-from-home students as possible, highlighting aspects of socialization and inclusion in the academic and urban background. Accepting this challenge has resulted in planning a multitude of activities for strengthening and diversifying hospitality services.

This publication illustrates Residence Halls with available accommodations in the city of Milano.

On the website www.residenze.polimi.it you can find detailed information about each residence, procedures of admission and payments of rents. Moreover, from the website it is possible to connect for booking accommodation online.

Allocation is according to chronological order of date of confirmation of online booking till the exhaustion of available places.

A portion of the available accommodation is reserved for students satisfying certain merit and economic requirements for student benefits and grants. To qualify for this accommodation students must apply via the procedure published annually by the Undergraduate and PhD Student Services Area - Student Benefits and Grants and International Mobility Section (www.polimi.it - Sezione Studenti - Sostieni i tuoi studi).

POLITECNICO DI MILANO RESIDENCE HALL

CASA DELLO STUDENTE

LEONARDO DA VINCI

Viale Romagna, 62 Milano
The residence hall is situated only a few metres away from Piazza Leonardo da Vinci, just five minutes walk from Piola M2 green line station. Designed and built in 1934 by Italo Azimonti, it has welcomed generations of engineers and architects. The residence hall has five floors, one of these is entirely dedicated to common areas. There are several study rooms, some of which have been designated by the University as reading and computerized rooms.

POLITECNICO DI MILANO RESIDENCE HALL

GALILEO GALILEI

Via Corridoni, 22 Milano
The residence hall, recently renovated, is situated in the heart of Milano. The complex, built between 1947 and 1950 by the architect Luigi Moretti, consists of two, thirteen-storey towers and the building known as the “Casa della Laureata”. The structure is considered of particular artistic-historical interest both due to the reputation of its designer as well as its architectural features; indeed, it is a Ministry of Culture and Environment listed building.

DATEO

Piazzale Dateo, 5 Milano
Accommodation is in a prestigious liberty-style building owned by the Municipality of Milano. Built in 1905, designed by engineer Bonomi, it has been completely renovated. The building stands out for its uncommon grandeur for a residential building and is designed as a quadrangle, which occupies an entire block, with a central courtyard.

The Politecnico di Milano is experimenting a solidarity initiatives with the neighbourhood in which students are engaged in support of elderly self-sufficient people and primary and secondary school pupils resident in the building itself.

The building houses the UNI Agency - Agency for university students (www.agenziauni.comune.milano.it), sponsored by the Municipality of Milano with the agreement of all universities in the Lombardy region.

---

- refreshment area on each floor with vending machines and microwave ovens
UNIVERSITY RESIDENCE HALLS, CULTURAL ACTIVITIES AND SPORTS

SPORTS
The Politecnico di Milano considers sport as a value and growth opportunity as well as recreation and important socialisation for its students. The focus is on students away from home for whom the opportunity to practice sport represents a significant element of hospitality.

Tournaments and competitions, individual sporting activity in affiliated sport grounds (including the famous Giurati, historic centre for athletics and rugby, located on the Leonardo Campus), courses, organised trips and meetings with top athletes, sports-related educational opportunities: these are the cornerstones of our commitment around which the various options revolve.

Sports activities are organized by CUS (University Sports Committee) Milano. CUS enrolment includes insurance and requires a health certificate for non-competitive activity (free appointment with CUS Milano doctors).
Further information on enrolment, affiliations, activities and competitions are available at: www.cusmilano.it

The Politecnico, in cooperation with CUS, organises a series of competitions for its students (ski races, five-a-side football tournaments, beach volley tournaments) in which representatives of the various Campuses compete. Similarly, tournaments are held with the participation of the hosts of Politecnico residences.

CULTURAL ACTIVITIES
The Politecnico di Milan provides funds every year for the realization of cultural and social initiatives on topics of general interest to students, to be carried out by groups and student associations.
The Politecnico encourage the establishment of student associations, with own statutes, which aim to promote the involvement and cooperation of members in the life of the university and organize cultural and recreational activities.

Among the initiatives are included conferences, exhibitions, concerts, magazines, theater workshops, movies, cultural trips, etc.
Calls are usually published in late October.

Proposals may be submitted by:
- associations and lists of students registered in university;
- groups of students composed of at least 50 students enrolled at Politecnico di Milano (this number is reduced to 20 students if enrolled at regional university centres and local offices)

Further information are available at: www.eventistudenti.polimi.it
