EDUCATING THE NEXT GENERATION OF DATA SCIENTISTS

Sebastian Link is an award-winning professor dedicated to finding deeper insights from better data. He has brought statisticians and computer scientists together to educate data scientists. Part of their education is the statistical language R, the world's most popular language for data analysis and developed right here at the University of Auckland.

He conducts research on the automated discovery of patterns to cleanse and structure data. This helps the next generation of data scientists gain more insights from better data using R. Sebastian is only one of many researchers who never stop pushing boundaries at the University of Auckland.

Welcome: QS World University Rankings by Subject 2020

Selina Griffin
Rankings Manager
QS Quacquarelli Symonds

Dennis Yu
Rankings Analyst
QS Quacquarelli Symonds

On behalf of the Rankings team at QS, welcome to the tenth edition of the QS World University Rankings by Subject. For this edition we have extended the publishing range of six of the subject tables, enabling more universities to feature in these rankings – the most popular of their kind. Our tables for Biological Sciences and Medicine now list 600 universities – making them both the largest of their kind.

Every year we review our method, data collection methods, and analytical scope to ensure that the comparisons we provide are robust, rigorous, and relevant. This year was no different. Putting together these subject rankings is an Herculean task for the Rankings team at QS: we have included over 15,500 departments in our subject tables, having evaluated over 100,000 potential inclusions. We assessed the citations impact of over 22 million papers produced worldwide, with a cumulative citations count of almost 200 million. This endeavour has resulted in 1,368 institutions from 83 locations featuring in our final tables.

Feedback from students in surveys and focus groups has consistently shown that they find the subject rankings the most useful of all the

rankings that QS produce. They constitute a relevant source of information to help students to decide which institution is right for them, in accordance with their priorities and career aspirations. QS is extremely proud of the level of detail these rankings are able to offer, and we continue to do our utmost to ensure their reliability.

...having evaluated over **100,000** potential inclusions. We assessed the citations impact of over **22 million papers** produced worldwide, with a cumulative citations count of almost **200 million**.

We hope that this year's edition of the QS World University Rankings proves illuminative, insightful, and useful – whether you are a student, parent, academic, or study and career advisor. We welcome feedback from, or engagement with, any stakeholder seeking to contribute to the evolution of this enterprise.

 June 10th - 11th, 2020

Clean trucking - can we realise the dream?

Running trucks on water sounds too good to be true. Yet scientists at Deakin University are preparing to do just that on the roads in Victoria, Australia.

Deakin is working with truck manufacturer Kenworth and technology leaders in hydrogen fuel-cells to establish the Deakin Warrnambool Hydrogen Transition Centre, the pathway to a \$20 million HyceL@Warrnambool facility.

As Australia's first commercial-scale hydrogen fuel cell manufacturing and prototyping operation, HyceL@Warrnambool will be based at Deakin's Warrnambool Campus. It will position Australia to tap into the world's multi-billion-dollar hydrogen market.

With support from the Federal and Victorian State governments, HyceL@Warrnambool is expected to be fully operational by the end of 2021. The Deakin Warrnambool Campus will become a living laboratory where communities, industry and governments can engage with the emerging hydrogen economy.

Deakin Energy Director Dr Adrian Panow explained that hydrogen offers significant advantages over battery-only heavy trucks, such as the ability to carry more cargo, refuel more quickly and reduce pressure on electricity networks.

"If successful, our enhanced technologies could be used by Kenworth trucks made in Australia and internationally by Kenworth's parent company PACCAR (US Fortune 500). This technology will also be applied to other heavy vehicles such as buses," said Dr Panow.

"With hydrogen taking off around the world – powering trains, planes, ships and more – we are confident we can help the trucking industry transition safely to hydrogen and reap its many benefits, and, of course, help our planet."

Overview: QS World University Rankings® by Subject 2020

John O'Leary
Editor

*The Times and Sunday Times
Good University Guide.*

The 48 subject rankings published by QS continue to grow both in scope and influence. Invariably valued by students ahead of institutional rankings, the 2020 exercise is by far the biggest ever, featuring 1,368 institutions and over 13,000 academic programs.

Several of the rankings have been extended this year, allowing 177 programs to feature for the first time. Among them are many at institutions that would not feature in the QS World University Rankings (QSWUR) because they are offered by specialist institutions that do not meet our criteria for inclusion in the main exercise. The Julliard School, in New York, leads the world for *Performing Arts*, for example, while l'Ecole hôtelière de Lausanne is world-leader for *Hospitality & Leisure Management*, and the Colorado School of Mines heads the table for *Mineral and Mining Engineering*.

Not surprisingly, however, higher education's luminaries continue to dominate in many subjects. Almost half of the rankings – 23 in all – are headed either by the Massachusetts Institute of Technology (MIT) or by Harvard, which are first and third respectively in the overall QS World University Rankings. MIT leads in five of the six engineering and technology categories, Harvard

in seven of the 15 tables pertaining to *Social Sciences & Management*.

Another six US institutions top at least one table and almost a quarter of all the programs listed in the latest rankings are American. The country has an even larger share of top-10 placings (139 of 482).

Comparisons with last year are difficult because of the scale at which the exercise has expanded. The tables for *Agriculture & Forestry*, *Biological & Environmental Sciences*, *Chemical Engineering*, *Mathematics* and *Medicine* all contain 100 more universities than in 2019's edition.

There has been a 12 percent increase in the number of responses to QS's academic survey this year, with almost 95,000 contributing to our analysis. The number of universities nominated by both academics and employers has increased by approximately 20 percent, enabling us to attain unprecedented depth of insight.

Yet the leading positions in most subjects remain remarkably stable and only nine of the 48 rankings have new universities at their head. All of them were in the top three in the relevant subject last year, several of them reclaiming a lead they had lost only recently.

Oxford is responsible for three of the new leaders, in *Anatomy & Physiology*, *Classics & Ancient History*, and *Modern Languages*. The university has enjoyed a highly successful year, attaining eight global number-one positions - four of them in the *Arts and Humanities*. Five other UK universities – which do not include Cambridge – are top in one subject.

As in other rankings, the advantages enjoyed by universities in English-speaking countries are apparent. Only the US, UK, Australia, and Canada have more than 100 placings in the top 50 of all subjects. But there are plenty of success stories elsewhere. ETH Zurich, for example, tops the table for *Earth & Marine Sciences*, while Wageningen University, in the Netherlands, does the same in *Agriculture & Forestry*.

China has continued the progress its universities made last year, with Tsinghua performing particularly strongly. 100 programs from universities in the Chinese mainland finish in the top 50 for their subject this year, nine of them from Tsinghua. This represents the reaching of a new frontier for Chinese higher education.

To reach the top 50 in any of the subject rankings is highly challenging. Only one institution in the Arab Region reaches these heights – King Fahd University of Petroleum and Minerals in *Mineral & Mining Engineering*. In Africa, just three achieve this feat – all of them in South Africa - and only the University of the Witwatersrand manages it in more than one subject.

Latin America does better, with five countries – Argentina, Brazil, Chile, Colombia and Mexico - represented in the top 50 of at least one subject. But just six universities account for the region's 19 top-50 placings, underlying the inequality prevalent across the region's higher education sector.

The geographical reach of the rankings has widened with this year's expansion. There are now 83 countries and territories represented, compared with 78 last year. Among those added in the latest edition are Bangladesh, Iraq, Kenya and Zimbabwe. Inevitably, most of the newcomers appear in the lower reaches of the tables.

As in previous years, the methodology used to compile the rankings varies by subject, reflecting differing publication cultures and data availability. In *Performing Arts*, for example, citations do not represent the academic currency that they have become in the sciences. Instead, the views of academics account for 80 percent of the scores and employers' views the remaining 20 percent in a ranking where specialist institutions take most of the leading positions. In *Veterinary Science*, by contrast, more than 100,000 papers were indexed by QS over a five-year periods, and, consequently, between them, citations and academics' H Index account for 60 percent of each university's score.

A total of 127,744,454 citations contributed to this year's rankings, after self-citations are excluded – 8 per cent up on last year. They came from 22,558,134 papers, a 1 percent increase on 2019.

When the 48 subjects are grouped into broad faculty rankings, the leading universities in the QSWUR show their strengths. MIT is the clear leader in *Engineering & Technology*, but also registers the best scores overall in the *Natural Sciences*. Harvard is the clear leader in the *Life sciences & Medicine*, and is even further ahead in *Social Sciences & Management*, but is second to Oxford in the *Arts & Humanities*.

39 years in education embedded
21st century technology approaches
with humanity values

25 key research areas including
local & cross border initiatives
benefiting community

1700+ industrial partnership
supported by entrepreneurship
ecosystem

40+ countries of international
students via various mobility
programmes

98.7% graduate employability
within 6 months of
convocation

30% of MSU faculty comprising
international lecturers
broadening MSU's
global outlook

172+ accredited
programmes

25 thousand
students

150+ leading international
universities's collaborations

Fields of study :

- . medicine
- . health science
- . optometry & visual science
- . pharmacy
- . education & social sciences
- . hospitality & creative arts
- . accounting & finance
- . business management
- . media science & graphic
- . engineering & technology
- . information sciences
& computing

Methodology: QS World University Rankings® by Subject 2020

Martin Ince

Writer & journalist in
higher education & science

For anyone with ambitions to study outside their home country, the QS World University Rankings by Subject provide an invaluable source of insight. While most of our other rankings look at universities as composite wholes, the subject rankings offer guidance for the vital choice of which university to choose for a specific subject and for a student's intended career path.

As in 2019, this year's ranking covers 48 subjects, which account for the vast majority of student choice at the undergraduate and postgraduate level. Major disciplines such as *Education*, *Medicine* and *Engineering* are here, along with less-commonly-adopted options from *Dentistry* to *Library & Information Management*.

These subject rankings are compiled on the basis of four indicators, chosen for their broad acceptability among experts as well as their relevance and capacity to offer serviceable data. Of the four, two are derived from global surveys of academic and employer insight - indicators which underlie all QS rankings, and which now draw on the wisdom of over 130,000 specialists.

The academic survey works by asking active university experts where they are, those subjects in which they specialize, and which are the top universities in the world for these disciplines.

The employer survey asks recruiters what type of graduates they recruit and from where they typically hire their most prepared, hireable, successful employees. We weight the employer replies according to the type of business they represent. For example, we would give a higher weighting to an engineering company's views on recruiting electrical engineers than to a response from a bank on the same subject. We attribute equal weight to national and international responses.

Our other two indicators reflect the importance of new knowledge production and dissemination as a marker of academic excellence. Our citations indicator uses the globally-respected Scopus database of academic papers and citations to determine which universities are producing the most influential research in each subject, using the citations derived on five years of papers published in the previous six. To avoid the risk of this indicator being biased by a few papers with many author affiliations, we omit from this calculation a small number of papers, not exceeding 0.1 per cent of the total, with the highest number of author institutions. The exact number beyond which papers are not counted varies with the publishing culture of each subject. Papers with many authors are far more common in biomedicine and physics than in the

arts. Some recent papers on gravitational waves have over 100 author institutions.

The fourth and final indicator also relates to research and is termed the H Index. This is a way of looking at the breadth of a university's research in each field as well as its depth. To get an H Index of 6 for chemistry, a university needs to have six papers with six at least six citations each during the time window that we sample.

The H Index has been criticised for a number of failings, such as its tendency to discriminate against women because of their often-interrupted work lives. Various alternatives have been mooted. However, we look at the H Index at the level of whole institutions, not individuals, so that this criticism does not apply to our use of this indicator.

Variable geometry

Academic disciplines are extremely different in practice and culture, and we recognise this reality by varying how we weight these indicators for the subjects we rank.

For the related disciplines that comprise the field of engineering, we rank academic and employer opinion at 40 and 30 percent each, with citations and the H Index weighted at 15 per cent apiece. For Physics & Astronomy, where we have indexed over 1.5 million papers in the Scopus database, we weight H Index and citations at 20 percent each, with academic and employer opinion at 40 and 20 percent respectively. Citations and the H Index account for 25 per cent each in Medicine, the most publish-or-perish branch of 21st century research.

There are also subjects in which research is less important as an indicator of quality.

In *Hospitality & Leisure Management*, Scopus contains about 15,000 papers pertaining to the subject, one percent of the total for *Physics*. So we omit the H Index from this subject and weigh citations at just five percent, with academic and employer opinion weighted at 45 and 50 percent respectively. For the *Performing Arts*, we abandon both research indicators, and weight academic and employer opinion at 80 and 20 percent each.

Academic subjects vary too in how widely they are taught. Thus, we publish the top 600 institutions for *Physics*, but only 50 for *Hospitality*. In 2020, we have deepened several of the rankings by adding new institutions. For *Medicine* and for *Biological Sciences*, we have increased our publication range from 500 to 600 positions, and for *Agriculture & Forestry*, *Chemical Engineering* and *Environmental Science*, from 300 to 400. *Chemical engineering* is such a niche discipline that this gives us almost complete coverage of this subject.

This expanded content means that this year's QS World University Rankings by Subject contain information on 1,368 institutions, 177 more than in 2019. MIT and Harvard top the most subject tables, with 12 and 11 number one spots respectively. But all levels of these rankings contain unexpected riches which deserve the attention of our sector.

THE FUTURE OF MEDICINE: Challenges and Opportunities in the Disruptive Era

Come to HUFS Meet the World

Hankuk University of Foreign Studies (HUFS)

Hankuk University of Foreign Studies, Leading a Globalized Korea

Hankuk University of Foreign Studies (HUFS), since its foundation in 1954, has been at the forefront of Korea's development, often dubbed the Korean miracle, serving as a pioneer and driving the economic growth and globalization of Korea. HUFS, a truly global university that fosters innovative leaders of the future.

Designated as a Specialized Educational Institution for Critical Foreign Languages

The enactment of the Critical Foreign Languages Education Act has expanded the platform for HUFS students majoring in critical foreign languages such as Vietnamese, Arabic, and Portuguese to grow into area specialists by gaining knowledge and experience transnationally. HUFS's prestige as the leading global university in Korea has been enhanced through university-wide academic programs such as HIMUN (HUFS International Model United Nations), which marks its 43rd anniversary this year, and a wide range of globalization programs which include the '7+1 Student Dispatch Program' where students study at overseas universities for one term, 'Honors Program for Area Specialists' to train and nurture area specialists with knowledge and practical experience, and a global internship program under which over 300 students gain on-the-ground overseas work experience annually.

- **Global Education Infrastructure**
HUFS teaches 45 languages in 52 language majors
- **Academic Exchange Agreements**
Signed with 832 universities and institutions in 98 countries
- **International Exchange Programs**
Number of HUFS students dispatched overseas : 1,843
Number of international students placed at HUFS : 636

Departments that Foster Global Leaders Prepared for the Ubiquitous High-Tech Era with a Convergence Mindset

- **EICC (English for International Conferences and Communication) Department**
The best Interpretation and Translation Curriculum in Korea
- **ELLT (English Linguistics & Language Technology) Department**
The first-ever department that combines language and technology in Korea
- **LD (Language & Diplomacy) Division**
An 'Elite Diplomat Academy' that nurtures future diplomats with the full range of competencies exemplified by HUFS
- **LT (Language & Technology) Division**
An 'Elite Trade Academy' that leads global industries and international trade
- **GBT (Global Business & Technology) Division**
Equips students with English language skills, IT capabilities, and a business mindset to become business leaders in the 21st century
- **BME (BioMedical Engineering) Division**
Fosters education that integrates the biomedical and engineering fields by fully utilizing IT

HUFS, A Global Hub at One with the World, has been visited by prominent political leaders

Starting with former President Washington Beltran of Uruguay in 1975, HUFS has had the honor of hosting heads of state from around the world such as Hungary, Poland, Mongolia, Portugal, and Indonesia, and most recently former President Barack Obama of the United States in 2012, not to mention Ministers and Vice Ministers of Foreign Affairs, Prime Ministers, Speakers of Upper Houses, and Speakers of Parliaments from many nations.

— Heads of state who visited HUFS (44 visits in total paid by heads of state, including 22 former and incumbent Presidents)

- Barack Obama, former President of the United States (2012)
- Mikhail Gorbachev, former President of the Soviet Union (2001)
- Joko Widodo, President of Indonesia (2018)
- Anibal Antonio Cavaco Silva, former President of Portugal (2017)
- Tsakhiagiin Elbegdorj, former President of Mongolia (2016)
- Bronisław Komorowski, former President of the Republic of Poland (2013)
- Laura Chinchilla Miranda, former President of Costa Rica (2012)
- Pal Schmitt, former President of Hungary (2012)
- Abdullah Gül, former President of Turkey (2010)
- Georgi Sedefchov Parvanov, former President of Bulgaria (2009)
- Lech Kaczyński, former President of the Republic of Poland (2008)
- Traian Basescu, former President of Romania (2008)
- Elias Antonio Saca, former President of El Salvador (2006)
- Leonel Fernandez, former President of the Dominican Republic (2006)
- Traian Basescu, former President of Romania (2005)
- Joseph Kabila Kabange, former President of the Democratic Republic of the Congo (2005)
- Stanisław S. Shushkevich, former President of Belarus (2004)
- Ernesto Samper Pizano, former President of the Republic of Colombia (1996)
- Zhelyu Zhelev, former President of Bulgaria (1995)
- Alberto Kenya Fujimori, former President of the Republic of Peru (1993)
- Fidel Sanches Hernandez, former President of El Salvador (1982)
- Washington Beltran, former President of Uruguay (1975)

ASU

جامعة العلوم التطبيقية
APPLIED SCIENCE UNIVERSITY

Accredited by the Higher Education Council

College of Arts and Science

- Bachelor in Computer Science
- Bachelor in Graphic Design
- Bachelor in Interior Design

College of Law

- Bachelor in Law
- Master in Law
- Master in Commercial Law

College of Administrative Sciences

- Bachelor in Business Administration
- Bachelor in Accounting
- Bachelor in Management Information Systems
- Bachelor in Political Science
- Master in Business Administration
- Master in Human Resource Management
- Master in Accounting and Finance

**London
South Bank
University**

College of Engineering

- BEng (Hons) Architectural Design Engineering
- BEng (Hons) Civil and Construction Engineering
